19th Century Danish Pine Sideboard

Danish pine sideboard with carved leaf pattern along front door panels. Doors are flanked by elaborate turned columns and topped by two drawers with traditional fluted vertical carving. The top was replaced at some point in time with an oak top, which is a darker contrast to the pine cabinet.

Restored and waxed, this sideboard is stable, strong and ready for use. Drawers function.

All scratches, cracks, dings, variation in color, stains and age-related separation are reflective of age and do not detract from the beauty nor function of this delightful pine sideboard. Note, there are no locks, doors snap in place.

Please refer to professional photos for clear understanding of color, condition, and details; photo lighting, individual monitor display and home lighting all impact how item is viewed. Photos are part of item description, please ask questions or request additional photos of specific areas if needed. Minor signs of old dried wormholes, back appears to have been repaired at some point in past.
