19th Century Danish Pine Chest of Four Drawers

This pine chest of four drawers has columns accenting the central three drawers which are slightly inset creating dimensional appeal. Restored, this dresser is strong, stable and ready for use. Note the natural wax finish that brings out the warmth of the pine. Drawers function, no key included as brass pulls are used to open drawers. All nicks (some filled in), scratches, cracks (top, sides, etc.), stains (top), age-related separation (see sides along front column trim), old dried wormholes (no longer active) and signs of wear reflect the generations of use and do not impact function of this charming pine chest of drawers. Old repair to crack above front right foot. Interior top drawer has an old knot that fell out creating a hole in the right side, but does not impact function. Please refer to professional photos for clear understanding of color, condition, and details; photo lighting, individual monitor display and home lighting all impact how item is viewed. Photos are part of item description, please ask questions or request additional photos of specific areas if needed.
